

# REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 27

THE REDCLIFF REVIEW THURSDAY, JULY 7th 1938

Number 4

## Stampede and Fine Horse Meet at Medicine Hat

Opens Thursday This Week and Friday and Saturday

Medicine Hat Stampede and race meet will be put on Thursday, Friday and Saturday this week-end. There will be events every afternoon.

There will be a good program of races of horses and ponies for both men and women.

Every afternoon and evening there will be a midway by Conklin and Canadian Shows.

There will be all kinds of sports and some one who purchased a ticket will be presented with a 1938 Ford DeLuxe Sedan.

## Militia Units to Now Train at Sarcee

Redcliff's Officers and Privates With the Company

Alberta soldiers have converged on Sarcee camp, Calgary, for annual training.

Five battalions of infantry from Calgary, Edmonton and Medicine Hat, comprising the Third Infantry Brigade, will have marched in last week-end.

Medicine Hat will be represented by the First Battalion, South Alberta Regiment, under Lt.-Col. G. Elder. Other units will be the Royal Canadian Army Service Corps (C.N.R.), Major R. Sash; the Royal Canadian Medical Corps and various non-combatant units. Lethbridge units will train at Camp Shilo, Manitoba.

## New Medium of Exchange for Alberta

Was Announced by Premier at Monday Meeting

Intimation that the next offensive of the Alberta Social Credit government against financial interests might take the form of a provincially-controlled medium of exchange, was made by both Premier William Aberhart and Hon. E. C. Manning, provincial secretary, principal speakers at a three-hour Social Credit rally in the Calgary Prophetic Bible Institute Monday night.

The young folk are certainly enjoying the old swimming pool for the past week. They are glad the old pool was not ruined before the new was finished.

Reports are that heavy rain showers were in the Blueville district last week-end and wheat crops are in good condition. Rains have delayed getting the cut hay into stacks.

The main highway between here and Medicine Hat is in a very rough condition now since nothing has been done to improve the condition since the rains. It is the worst it has been for some time. It is hoped either the federal or provincial officials will soon make some improvements as this is a highway that is most used.

LOOK AT YOUR LABEL.

## Local Swimming Pool Meeting Next Thursday

Making Arrangements For The Opening of New Pool

A meeting of the Swimming Pool Committee will be held in the Legion Reading room next Thursday evening, July the 15th and all members are requested to be present.

At this meeting arrangements will be made for the opening of the new pool and committees will be appointed for arranging sports of all kinds for the opening.

It is hoped all members will be present as all will have some work to do. The meeting will be opened at 8 o'clock.

## Federal House Ended The Session on Dominion Day

Eventful Session Since Liberal Government Elected

Longest and most eventful session of parliament since the Liberal government was elected in 1935 is ended. After five months legislating and debate, keyed to a high pitch in the past week, preoccupation came in mid-afternoon Friday.

The session had a dozen highlights. A housing program was passed, the sales tax was lifted, some building materials, the Bank of Canada was nationalized, the government's transport bill finally met with senate approval, provision was made for plans to municipalities, and the senate conducted a long probe of Canada's railway problem.

Several measures introduced or contemplated by the government were sidetracked. The senate killed the bill to set up a penitentiaries' commission, the bill to control political expenditures was left over until next session, the commonsense throw on the senate bill widening the grounds for divorce, and regulation of small loan companies' charges was deferred.

## Possible Minimum of Price for the Wheat

Appears Wheat Board Will Be In Operation This Year

It now appears definite that the Wheat Board will be in operation in Canada this year and that a minimum price will be fixed for wheat delivered by producers thereto. No information is available as to when the minimum price will be announced or what the figure will be. Western farmers hope that it will be at least 87½¢, the figure fixed in 1935. The government, however, may wait for further development hoping that the situation will be clearer somewhat later on in the season.

Thousands of horses in Manitoba died last year from the brain disease of encephalomyelitis. It is reported there are many other horses dying from the same disease this year both in Manitoba and Saskatchewan, as there was a shortage of serum to treat them.

Rt. Hon. R. B. Bennett

Gracious and generous tributes were offered Rt. Hon. R. B. Bennett, Conservative leader, by representatives of all parties in the House of Commons in what may be his last appearance as leader of the opposition. Mr. Bennett appeared greatly touched by the demonstration of respect which came as the tributes of the 1938-session of parliament, his 11th as leader of his party.

His 68th birthday was last Sunday. He was born in Hopewell, N. B. on July 3, 1870 and came to Calgary 41 years ago.

## British Prime Minister Gave Fair Ideas

Declare Determination to Avert A Similar Calamity

At a party rally in England last Saturday Prime Minister Chamberlain said, "We would fight again" if there were no other way of preserving our liberties. He also described the horrors of modern warfare and reminded that 21,000,000 people died in the Great War and 3,500,000 were British and he declared the government's determination was to avert a similar catastrophe.

Mr. Chamberlain also declared that he was not going to take the chance of involving Great Britain in a war because some British ships took the risk of trading in Spain to make huge profits.

"I feel it is my prime duty," he said, "to strain every nerve to avoid a repetition of the Great War in Europe, and I cannot believe anyone who is not blinded by party prejudice could fail to agree with me."

## New Swimming Pool is Proceeding Favorably Now

Is Expected to be Opened Up Very Soon Now

During this week considerable work has been completed in connection with the erection of the New Swimming Pool on Third St.

The cement has been laid down for the bottom of the pool and the rest is being scattered fairly well every day. The drain to empty the pool is being dug and it is assured it will be completed in a few days.

All the work appears to be done in satisfactory condition and it is hoped it will be one of the best when finished.

It is hard to say just what time the new pool will be opened.

## Conservative Ottawa Meeting For New Leader

Several Candidates Mentioned But Not Yet Decided

There is a large meeting of Conservative representatives from all parts of Canada. At the convention held in Ottawa this week. As Mr. Bennett is retiring as leader of the party, this meeting is held to decide if appoint a new leader of the party.

There are a number of young and older Conservatives mentioned as possible leaders but the new leader will not be decided until some time this evening.

Among the possible candidates are Hon. R. J. Manion, Hon. Arthur Meighen, M. A. Macpherson, Regina, Hon. J. E. Lawton and Denton Masser, Toronto, and H. B. Stevens of B. C.

Tender For School Work

Prices wanted for replacing damaged shingles and painting roof of Redcliff School with two coats of paint, price for the East and West portions to be given separately. Paint and shingles supplied by School Board. The lowest or any tender not necessarily accepted. Tenders to be submitted in writing by noon July 13th to

Secretary-Treasurer  
Kestley Johnson

## The Provincial Official Inspected Pump Station

Met With Mayor and Council Here on Monday

Mr. Pearson, who is Superintendent of the provincial government power plant, was in town last Monday to meet with Mayor and Councillors to get some information as to what the town needs for improvement in the pump station.

Councillor Rindahl, who is chairman of the water works department, took Mr. Pearson down to the pump station to investigate all requirements. Mr. Pearson was well informed of conditions but nothing definite was stated for improvement until he reported to the department.

## Farmers Eggs To Be Tested in Medicine Hat

Farmers Have To Pay So Much A Dozen For Testing

It appears now that the testing of eggs have been approved by officials in several districts and in some sections, farmers have to send their eggs to the officials. When the eggs are sent to official testers the farmers have to pay so much a dozen for the tester's work.

As the price of eggs is set by merchants and the farmers have to pay to test their eggs, the poor farmers will now get less price for their eggs.

We are informed by a merchant here the farmers have to send their eggs to Medicine Hat to be tested. As it may take several days to get them back here again our farmers eggs will not be quite so fresh.

As well as having the farmers to send their eggs to Medicine Hat for testing some of them get broken going and coming and they lose more.

Many are of the opinion that the merchants themselves should be able to test the eggs and save some money for the farmers.

The Ottawa parliamentary Session was closed last Friday for this meeting.

The manager of the chicken ranch in the Ponoka Mental Hospital want out to shoot some skunks who were stealing his chicken. He saw what he was as a skunk in a pile of hay and fired at it. When he went to get it he found he had killed a man who had been a patient of the mental hospital.

## A New Tennis Court Added to Fourth Street

A Number of Young People are Interested in the Game

As a number of young people in town have joined the tennis court on Fourth St. the committee has just completed an additional court and it is in splendid condition.

Every evening there are a number members on the grounds and all the courts are being occupied until dark.

The committee has done considerable work during the past few weeks and now everything is in good condition. Last year a number of trees were planted around the first court and all are growing nicely. Additional trees are being planted around the new court.

There are a number of old and young citizens who are interested in watching the games and having most enjoyable evening.

David Floyd left yesterday by bus to visit his Aunt and Uncle at Sovereign, Sask. for a few months.

Miss (Nurse) Sanderson, who is having her holidays from the Medicine Hat Hospital, left yesterday for Winnipeg to visit friends.

Redcliff School girls played a game with the Tilley girls last Friday and our girls won the game by 8 runs to 6. They only played seven innings as a heavy rain stopped them. There was a fine dance in the evening.

Western Canada's war on grasshoppers may be aided by a little bee-fly from the Argentine being experimented with in the Dominion entomological laboratory. It is believed the little hopper-killer from South America may be the right antidote to the grasshopper plague.

Argument has started before the Privy Council on the validity of Alberta legislation respecting newspapers, credit regulations and the taxation of banks. The bills were declared unconstitutional by the Supreme Court of Canada and Alberta appealed.

Probably no name was so well known in the international grain trade as that of George J. B. Broomhall, who died in Liverpool, England, last week at the age of 82 years. For fifty years the late Mr. Broomhall has been supplying information and statistics on the grain trade until his name became a household word in the great wheat exporting and importing countries.

Services for July in Gordon Memorial Church will be held as follows:

July 3 at 7.30 p.m.  
July 10 at 7.30 a.m.  
July 17 at 7.30 p.m.  
July 24 at 7.30 p.m.  
Church School as usual at 10 a.m.

The Sunday School Picnic will be held in the Medicine Hat Park, July 18. Cars leave the Church at 1 p.m.

Joseph H. Unwin, S. C. Member of Alberta legislature, is making a speaking tour in Ontario to hold meeting in 64 points.

To The Loving Memory  
Of My Son  
Colin (Bob) Wilson  
who died July 3rd 1937

One sad and lonely year has gone  
Since our great sorrow fell.  
The shock that we received that day  
We still remember well.

Friends may think we have forgotten  
When at times they see us smile.  
But they little know the heart-ache

The smile hides all the while.  
Ever remembered by his  
Mother, Regina, Sask.

## WHERE DOES ALL THE MONEY COME FROM?

MORE than four and one-half million depositors in Canada have "money in the bank."

They are satisfied to leave their money on deposit because Canada's chartered banks are ready and able to pay back promptly every cent when the depositor calls for it.

These deposits in the chartered banks total roughly \$2,262,000,000—approximately 10 per cent. of which they carry in cash—in other words Bank of Canada money or "legal tender."

Some people do not fully understand banking operations and might ask:

1. What have the banks got to represent our deposits if they do not have it all in cash?  
Here are the banks repay our deposits, over \$2,262,000,000, with the amount of cash they hold!

The answer to No. 1 is: Look at any bank balance sheet and you will see for yourself that a bank owns more than it owes. That is to say—if all of its depositors were paid off and all of its other debts paid, a balance would be left belonging to the shareholders.

That should answer your first question satisfactorily. And now for No. 2.

Look again at a bank balance sheet and you will see that in addition to the cash it holds, the bank owns assets quickly convertible into cash, or which can be used to borrow from the Bank of Canada.

Experience has taught banks the amount of cash it is necessary to carry to meet ordinary day-to-day demands, and also the proportion it is necessary to carry in gilt-edged quick assets which can be liquidated to meet even any extraordinary demand. Banks know that it is absurd to expect all depositors to call for their money at the same time.

That would be like saying that if everybody got sick at the same time there would not be room in the hospitals to take care of them.

Or that if everybody who travels by street car decided to travel at exactly the same hour, there would not be enough cars to carry them.

Or that if every person who carries life insurance died on the same day all the claims could not be met.

Or that if every sea were drained dry there would be no ocean liners.

Such statements are meaningless when you expose them to the cold light of common sense.

Where, then, does all the money come from? That question can best be answered by asking this one: Who owns it—and how do they get it?

Addressing ourselves to 4,740,000 depositors we answer: "This money is yours. You own it. When you call for it, you get it. When you ask any existing Canadian bank for it, do you ever fail to get it promptly?" We ask you, too: "Do you regard your deposit as secure in a bank?"

## THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience.

## The Industrial East Spends over \$40,000,000 with the Western Farmer each year

Any fellow who consumes over \$40,000,000 worth of Western goods is worth knowing. And when you know him, you'll find he's a pretty good fellow—a worker and a family man like yourself, who likes to keep busy.

Your purchase of a Canadian-built car helps keep him busy and on a pay-roll. For Eastern automobile plants alone employ over 18,000 workers and in turn, spread employment—and purchasing power—over many other industries, including textiles, paints, glass, chemicals and steel.

Sure, it's a good thing to know that the Eastern industrial worker is busy and happy and in a position to maintain and augment his purchases which in 1936 alone included over 80,000 tons of fresh dressed meats, 175,705 head of cattle, 21,144 calves and 41,557 hogs to say nothing of 10,000 tons of butter and poultry, eggs, honey, grain products and other commodities to the value of more than \$15,000,000.

For statistical and further information about this industry, write to Automotive Industries, 1006 Lansden Building, Toronto.

"Wee Jinny," said to be the world's smallest racehorse, is dead in South Africa. Perfectly proportioned, she was 3½ years old, 28 inches high and she weighed pounds.

## Delving Into The Past To Piece Together The Story Of The Lost People Of England

Little by little, the patient toil of the archaeologist is piecing together the strange story of how they lived and worked; their dwellings; the hills they worshipped in those far-off days when Rome was young—slowly these things are again emerging into the light.

Yet it is a story with many missing chapters still. Here and there, heard by some mysterious moonlight on earthwork, excavations reveal concrete evidence of a civilization that grew and died centuries before recorded history. But who the peoples were, how and why they disappeared, no man can say with any certainty.

Almost half-way in the train journey between Plymouth and London, the Canadian visitor will not be startled by what appears to be the irregular lines of old enclosures. Round the hills they run, interconnecting a device of signs. Occasionally, earthworks rise above plain and rising land. Stone circles and their towers of mystery. They are part of a great mystery linked by green roads which traversed England from sea to sea long before Britain heard the clatter of Roman legions or the first Celt crossed the narrow sea from Gaul.

Who dwell there and why were these great earthworks raised? The usual explanation is that they were built for defence. But defence against whom? The earliest written records of the Castles in Dorset cover five miles. What peoples in those dim days could have needed such elaborate defence? What peoples were so numerous as to hope to conquer them by assault?

Dr. R. E. M. Wheeler, who has been conducting excavations at Maiden Castle, says that the multiple defences there imply a large population. In one pit, more than 4,000 sling stones were found. There were loam weights cut from chalk, innumerable bone arrowheads, even a piece of carbonized wood. Who were these people who came and went and left no history? Archaeologists have theories but so far no concrete fact. They are the lost peoples of England.

### Depends Largely On Health

No Hard And Fast Rule For Reaching Long Century Mark

These centenarians get more confounding every day.

A woman in Mitchell, Ontario, who is 101 dies at half past four every morning and attributes her long life to early rising.

No doubt she goes to bed early and has her eight hours, but what's the use of lying to 100 if one goes to bed early in the evening and gets up in the middle of the night?

Another centenarian will say that the secret of long life is to not get up early.

One will say that long life is only attained by total abstinence and no smoking. Yet there are plenty of centenarians who will claim that a "nightcap" and plenty of good tobacco kept them in perfect health.

So there can be no hard and fast rule for reaching the 100th year. What suits one person does not suit another. If total abstinence from alcohol and tobacco are the secrets, then there are thousands of people in Ontario who ought to live to 100 but won't.

Largely it depends primarily on a sound constitution, moderation in eating and drinking, plenty of fresh air and exercise—and freedom from organic ailments, says Dr. J. H. Thomas, Thomas-Journal.

### New Signaling System

A new signaling system, with photo-electric "eyes" apparatus and without sensors for signal boxes, is being considered in the Dominion of four main-line railways. Trains miles away will be made visible on the screens in thick fog or darkness, and signals will be set in motion by light at approaching traffic. All four main systems may be converted to the new system in three years.

### Germany Discards Time Clock

Punching the clock when reporting for work is being abolished in Germany as a system that is "contrary to the spirit of the new era and the honor of the laborer." It is being replaced with a roll assembly before work, or a joint, or both. In some places this joint assembly is turned into a ceremonial act at least once a month.

### Newspapers Widely Read

No Cause To Be Afraid Of Radio

We are getting to be calmly afraid of the radio. When a statesman with a cause or an axe goes on the air he modestly claims 50,000,000 listeners and upwards. The odd thing is that he rarely tries to question his figures. And there are not 18,000,000 homes with radios in the country? Are there not 4.1 percent per family? Doesn't this make something like 75,000,000 listeners hanging on to the orator's every word?

But no one really knows how many of the nation's radios are tuned in to this particular earthshaking event. There are the millions of radios that are not attuned; the dials turned to the dance music programs, the comedies, the race commentaries, the shaving soaps, the folk songs, the cigarettes, the rumbas. No doubt, when you have made all deductions, like the income tax statements, there will still be an impressive remainder. A national figure over the radio may be a more accurate estimate than the figures of the papers. But his speech on the front page of the papers next week will have 35,000,000 readers.—New York Times.

## GARDENING

Gordon L. Smith

**Shapes And Hues**  
Annual flowers are classified under various heads in the seed catalogues. Attention must be paid of course to time of blooming and color. Height would also be noted as a bushy plant placed behind by some bushy shrub or tall Cosmos, will be "born to die."

Blue shades are most popular. The most elemental points of color are the gardeners of a few years ago. The colors of the flowers are the most important. Certain shades blend well together and other a whole bed will be selected with the blending in mind. Of course for this sort of thing, the gardeners must be well versed in the same period. Fragrance must be taken into account, as the gardeners must be well versed in the same period. Fragrance must be taken into account, as the gardeners must be well versed in the same period. Fragrance must be taken into account, as the gardeners must be well versed in the same period.

In shaded quarters, delicate colors like Negatives, Pinks and white flowers will do well. In fact, they prefer this location to any other. In partial shade, Gloriosa, annual Larkspur, Lupine, Nicotiana, Phlox, and Verbena should be grown. On poor soil, Portulaca is a favorite. In the garden, Sweet Peas, Stocks, Lilies, Calliopsis, Chrysanthemums, and others should be grown. In the garden, Sweet Peas, Stocks, Lilies, Calliopsis, Chrysanthemums, and others should be grown. In the garden, Sweet Peas, Stocks, Lilies, Calliopsis, Chrysanthemums, and others should be grown.

**Fruit For The Garden**  
A number of apples like Yellow Transparent, Astrakhan, etc., should be chosen for dessert purposes, or for cooking. For fall, Wealthy; for early winter the McIntosh or Delicious; and for late winter, the Northern Spy. In the Prairie Provinces or Northern Canada and Ontario, there are some new hardy types as well as good grass apples available. Among sweet cherries, Windsor, Bing and Tartarian are recommended, while Montmorency and Early Richmond are standards of the other type. Clapp's Favorite is one of the best pears, growing very early, while Bartlett is good for late summer. Plums are good anywhere in Canada, as well as currants, raspberries, strawberries, and gooseberries. Grapes, including the Concord, are also the best.

**Many Farms Approved**  
As a result of the first year's operation of the Grade A policy of the Dominion Department of Agriculture for eggs, 540 farms have been approved, upwards of 50,000 cases marketed, and a premium of approximately \$60,000 returned to the producers. Grade A1 eggs are produced on farms approved by the Dominion Minister of Agriculture.

**Valuable To Gardeners**  
An ordinary tool, fully patterned and made in wood and iron, worth twenty dollars to a gardener, according to Prof. A. F. Convery of the University of Toronto. He does not guarantee that such a price can be obtained, but gives the assurance that he recognized as a value not a single drop.

"Fancy having to wait for his wife to come home to get some money?"—Schuch in Everybody's Weekly, London.

### See No Real Danger

British Editor Finds Strong Anti-War Feeling Everywhere

There is no real danger of a European war for at least eight or nine years—and, if we have not found means of doing away with it by that time, we will deserve one. This Vernon Bartlett, Foreign Editor of the London News Chronicle, editor of the magazine, World, and his chief contributor for the British Broadcasting Corporation, summed up the present state of affairs in Europe, when he addressed a large audience in Convention Hall, Toronto.

"Everywhere I go I find a strong anti-war feeling," declared Mr. Bartlett. "There has been no belief in any country I have been in that war would better matters any."

Adolph Hitler himself did not want war.

"Germany knows that she has far fewer friends to-day than she possessed in 1914," he continued. "I do not think that she would risk the folly of plunging Europe into another war. There are various other highly important reasons. For one thing, Germany is very vulnerable from the air, and aircraft will play a major part in the next conflict."

First Trump—What would you do if you won the Irish Sweep? Second Trump—I should have all dark seas uphoisted.

### A Super Gasoline Engine

Builders Afraid It May Blow Heat To Bits

A new gasoline engine, which may revolutionize air transport and make motoring cheaper, has been invented by an English inventor. It will have its first test in a re-entrant engine but as the builders of the engine believe it will develop such colossal power that it may blow heat to bits.

The inventor has disclosed that the engine is a gasoline turbine, the subject of countless unsuccessful experiments during the past 30 years. Experts who examined the plans declare that if the engine proves only 10 per cent, efficient it will develop as much power as a similar sized gasoline engine and will cost considerably less to build.

Northampton's tank—a war relic—may make its re-appearance in the form of a razor blade soon. The offer of a Sheffield firm to dispose of the trophy for £30 has been accepted by the Town Council. Its cost during the war days would be about £5,000.

Rees that cannot see the color red, however, see color at the ultraviolet end of the spectrum invisible to man.

The only substitute found so far for gasoline is also leather.

## THE SNAPSHOT GUILD

SPRING LIGHTNING

Lightning and moonlight pictures are unusual and fascinating and you can take them with any kind of a camera. April showers not only bring May flowers but night-light electrical storms as well. And there's your chance for sensational lightning pictures. With the dark, clouded skies in fantastic, fascinating flashes and brilliant colors, which can be captured by your magic shutter. There is no trick involved in taking lightning pictures. It is the simplest of all. It is raining during the night, the lightning is waving its webs of flashes across the sky, and you don't want to get wet, take your camera on the inside through an open window and point it in the direction of the last few flashes. But, of course, if the camera is shut down, the first flash opening or "step." You may miss the next one, but the next flash or leaves it open for the beginning of several flashes. Of course, if you leave the shutter open for many flashes, you will get a fantastic congregation of ribbons of light but not a true picture of a single flash. However, if you are lucky, you may, say the least, and well worth adding to your collection of "shots."

It is an honest-to-goodness thing, it will pay you to sit well back to take several pictures for the reason that such a picture is the more ribbons of light alongside those that are dark, the greater the chance for a really good picture. The only form of lightning that

## Precautionary Measures Needed In Selecting Field Crops To Be Grown In Dry Areas In West

### Red Clover Always Popular

Seed Supply Is Not As Large This Year

Red clover is always in popular demand in Canada and prominent in more than average demand this spring owing to the unusual shortage and high price of alfalfa and timothy seed. According to the feed branch, Dominion Department of Agriculture the red clover seed supply is not as large as in most years. Last year's total production in Canada was about two and one-half million pounds, and with the half million pounds or so of imported English red clover seed there will be available for seeding in Canada this spring about three million pounds. The normal annual Canadian consumption is more than this being between four and five million pounds.

The continued low purchasing power of farmers will of course have an effect in reducing seed purchases, but the relatively low price for red clover seed as compared with alfalfa and timothy, will probably increase the preference for red to the extent that the total supplies of red clover seed available will likely all be secured before the season is over.

Most of last year's red clover seed crop in Canada was grown in Eastern Ontario and Quebec, which is fortunate from the standpoint of seed supply, but it is not the greater part of this seed is now in the hands of the seed houses for resale, but considerable quantities are still held by the growers in the Plantagenet area in Eastern Ontario and in the Montreal district in Quebec. Further information as to sources of supply may be obtained from the feed branch, Dominion Department of Agriculture, Ottawa.

### Made Aviation History

"Plane That Once Commanded Headlines Now Carrying Fish"

Lastly winging its way, a huge aeroplane of the monoplanes type, may be seen daily flying a scheduled route between Edmonton, Alberta, and 200 miles north of Edmonton, and the numerous lakes in the northland. Once it commanded newspaper headlines, it is now a part in making aviation history.

With Berni Halchen and Floyd Bennett at the controls, the big ship, built by the Canadian government in 1924, rescued Baron Guimard von Hunsfeld, Captain James Fitzmaurice and Captain Herman Kohn, forced down on the first east-west trans-Atlantic flight, on lonely Greenly Island, off the rockbound coast of Labrador.

The crew of the Bremen hopped off from Ireland on April 12. Their gasoline supply became exhausted after a 125-mile flight across the ocean. Almost within flying reach of New York, their objective, they were forced to land. Halchen and Bennett, in the meantime, were rescued from the rocky island in the Straits of Belle Isle where they had crashed their aeroplane.

Later, the big monoplane carried the mother of Charles A. Lindbergh from Mexico City to New York when the flying colonel was engaged in a North and South American flight. For three years the big, all-metal ship loaded with night-vision, was a familiar sight over Niagara Falls. To-day, it is relegated to the commonplace task of hauling fish to market from the lakes in Northern Alberta.

### The Modern Farmer

Requires Skill And Knowledge To Make Success Of Job

There is no question that the farmer of today is a skilled man. The many city dwellers have little idea of the amount of skill and detailed knowledge necessary for success in farming. The skill must take several forms. There is the manual dexterity and mechanical sense needed for operating both ordinary and modern farm machinery, and the knowledge required in dealing with horses and stock. And above all there is the judgment which decides the right moment to carry out this or that operation on any particular area of soil, and the managerial capacity to make the most efficient use of the land. The degree of foresight and skill demanded is much higher than is expected of the modern farmer. The degree of foresight and skill demanded is much higher than is expected of the modern farmer. The degree of foresight and skill demanded is much higher than is expected of the modern farmer.

Russia now is making 57 varieties of sausage, but is sticking to only one line of biology.

The security of feed crops during the past season has been assured when it decreased the efficiency of farm horse power at the very time when security was urgently needed to enable returns to more normal conditions.

Experiments and observations at the Dominion Experimental Station, Swift Current, Saskatchewan, indicate that precautionary measures in the future should include growing those crops which are now known to be more certain of production. Annual feed crops offer more security in most cases, when grown on summer-fallowed land.

Bazens cuts grown on summer-fallowed land at the Dominion Experimental Station. The normal annual Canadian consumption is more than this being between four and five million pounds. The continued low purchasing power of farmers will of course have an effect in reducing seed purchases, but the relatively low price for red clover seed as compared with alfalfa and timothy, will probably increase the preference for red to the extent that the total supplies of red clover seed available will likely all be secured before the season is over.

Most of last year's red clover seed crop in Canada was grown in Eastern Ontario and Quebec, which is fortunate from the standpoint of seed supply, but it is not the greater part of this seed is now in the hands of the seed houses for resale, but considerable quantities are still held by the growers in the Plantagenet area in Eastern Ontario and in the Montreal district in Quebec. Further information as to sources of supply may be obtained from the feed branch, Dominion Department of Agriculture, Ottawa.

Lastly winging its way, a huge aeroplane of the monoplanes type, may be seen daily flying a scheduled route between Edmonton, Alberta, and 200 miles north of Edmonton, and the numerous lakes in the northland. Once it commanded newspaper headlines, it is now a part in making aviation history.

With Berni Halchen and Floyd Bennett at the controls, the big ship, built by the Canadian government in 1924, rescued Baron Guimard von Hunsfeld, Captain James Fitzmaurice and Captain Herman Kohn, forced down on the first east-west trans-Atlantic flight, on lonely Greenly Island, off the rockbound coast of Labrador. The crew of the Bremen hopped off from Ireland on April 12. Their gasoline supply became exhausted after a 125-mile flight across the ocean. Almost within flying reach of New York, their objective, they were forced to land. Halchen and Bennett, in the meantime, were rescued from the rocky island in the Straits of Belle Isle where they had crashed their aeroplane. Later, the big monoplane carried the mother of Charles A. Lindbergh from Mexico City to New York when the flying colonel was engaged in a North and South American flight. For three years the big, all-metal ship loaded with night-vision, was a familiar sight over Niagara Falls. To-day, it is relegated to the commonplace task of hauling fish to market from the lakes in Northern Alberta.

### Baking Monster Pie

Yorkville Village Aims To Beat Two Former Records

Up in Denby Dale, in Yorkshire, England, they have for the past two centuries, always baked a special, gigantic pie to mark an event of national importance. This year, to celebrate the Jubilee to be celebrated, they have decided to go the limit, and bake a pie bigger and better than has ever been baked before. Which means something, when two past records are considered. One pie, baked during the last century, took 21 horses to pull it out to the fair grounds where it was cut. Another pie, baked in 1924, was cut into 20,000 portions which were sold in aid of a hospital. Now, if this year's pie is going to beat all records, how many horses will be needed to pull it out, how many pieces will be cut from it?

### Gift To Italy

A Roman silk stock, found in 1870 at Netherland, near Mayport, Cumberland, dedicated to Jupiter "in discharge of a vow," is to be presented by the Italian government to Russia 2,000 years after it was set up. The gift is being made by Col. Massimo Rocca. The stock, set up on suggestion by Lord Howard of Penrhyn, formerly ambassador to Italy.

### Only One Allowed

There can be only one "Alaturk" in Turkey, and that is the Ghazi Mustafa Kemal. The Ghazi made the law which has just been passed by the Turkish parliament at Ankara. Other persons are forbidden to use the name for it means "Father of the Turks" or "The Greatest Turk."

Russia now is making 57 varieties of sausage, but is sticking to only one line of biology.

**Interesting  
Local Items**Merchants in Medicine Hat  
are having a half holiday today  
for the stampede.Fall rye in some districts is  
now being cut and is exception-  
ally heavy with fine heads.Louie Lee who has been the  
cook in the Club Cafe for some  
has been ill and left this week to  
Calgary.John Moore, son of Mr. and  
Mrs. Basil Moore, fell off his  
pony last week-end and broke  
his arm.It now looks as though the  
seven days rain we have had is  
now over for awhile. We hope  
there will be some more by next  
week.Hail storms hit a few sections  
of the province. West of here  
towards Vauxhall was hail but  
we heard most of it did very  
little damage.Miss Sellhorn, a high school  
teacher, has been appointed as  
examiner for high school papers  
in Edmonton and left for there  
last week-end.Fine samples of growth of  
wheat and oats near town are on  
exhibition at the local Legion.  
These were grown on Mr. N.  
Dacre's land.Mr. and Mrs. E. Thacker and  
child accompanied by Mrs. Mor-  
rierson, have left for holidaying in  
Calgary. Mr. Thacker of the  
School staff is taking a course of  
general shop at Summer School.A number of Shetland ponies  
from Raymond Dubois's ranch  
have been purchased by several  
young lads in town. There are  
a number of processions around  
town.Mrs. Edward Ellis, who was a  
resident here for some time but  
now resides in Medicine Hat,  
met with an accident this week.  
She fell down the stairs in Holy  
Trinity Church and is now in the  
hospital. Fortunately she  
was not seriously hurt.**Roofing,

were picked up at Taber last  
week. Fortunately none have  
been found around here.From all sections of Alberta  
with the exception of a stretch  
northwest of Edmonton it is  
practically assured of fairly average  
crop in this province.Miss Kane of this school staff  
left last week-end for Calgary  
to visit her parents. During  
the holidays she will visit  
friends in Vancouver.It is reported that after heavy  
rains the old Bray Lake is now  
4 feet deep with water. Several  
lakes north of here are also well  
filled up.Mrs. Keith Ellis returned  
home from Turner Valley this  
week to spend his holidays here  
with his parents Mr. and Mrs.  
Allen Ellis.Service will be held in Gordon  
Memorial Church on Sunday  
morning at 11.15. Mr. Allison  
will be present. He was in-  
duced in Memorial United  
Church, Medicine Hat, last  
Wednesday.This week a number of local  
I.O.O.F. members of men and  
women, attended a convention  
at the lake south of Maple Creek.  
There was a large attendance  
of members from Saskatchewan  
and Alberta.Every day last week we had  
a rain in this district. Some  
were a kind of a cloud burst and  
others were a light shower.  
Wheat crops and pastures are in  
fine condition now and prospects  
are good for a fair crop.Would Party who is sending

**How Does  
Life Insurance Benefit  
The Farmer's Wife  
and Children?****Answer.**—If the farmer has Life Insurance, the wife  
and children know that they will not be in want in  
case of his death.**Question.**—How would insurance help?**Answer.**—It would provide money for living  
expenses, to pay debts, meet mortgage payments,  
hire help, avoid sale of the farm at a sacrifice.**Q.**—Couldn't this be done through ordinary  
savings?**A.**—Usually a farmer leaves only a small amount  
of cash. Not can he save to live long enough to  
save an adequate sum. Only through Life Insurance  
can he, with a minimum of saving each year, have  
the necessary money available in case of death.**Q.**—How do the children benefit?**A.**—The father who has Life Insurance is sure that  
the children will have the home, care and education  
that he intended.**Q.**—How does Life Insurance benefit the farmer  
himself?**A.**—If he lives to a retiring age, his insurance will  
provide a cash income to care for him.**Life Insurance****It Pays to Advertise in The Review**
